PETITION TO ACCORD CORRECT FILING DATE UNDER 37 C.F.R. § 1.10

MAIL STOP ISSUE FEE
COMMISSIONER FOR PATENTS
P.O. BOX 1450
ALEXANDRIA, VA 22313-1450

Despite Applicants' previous successful petition to accord the above-referenced application the correct filing date, the U.S. Patent and Trademark Office (PTO) does not appear to have corrected the filing date in its records and continues to indicate the incorrect filing date in correspondence with Applicants. **Applicants' filing date is May 9, 2001, not May 10, 2001**, as indicated in the PTO's most recent correspondence. Applicants request that the PTO update its records to reflect Applicants' correct May 9, 2001, filing date.

Applicants filed on June 5, 2001, a petition to accord this application the correct May 9, 2001, filing date, a copy of which is attached as Exhibit A. As shown in Exhibit A, Applicants provided Applicants' Express Mail receipt showing May 9, 2001, as the date in and a copy of an Express Mail Corporate Account Mailing Statement showing the same. The PTO confirmed that its records reflected the correct May 9, 2001, filing date for this application in the Office action dated August 8,

2002, attached as Exhibit B. That Office action states, "It is duly noted that Applicant has requested that the filing date be corrected. PTO records indicated that the filing date for 09/853,507 is 5/9/01." (Emphasis added.)

However, it does not appear that the corrected date has been made of record. Accordingly, Applicants request that the filing date be corrected and that a new official Filing Receipt be issued.

Please return the enclosed postcard to confirm that the items listed above have been received.

Please call the undersigned if any further information is required.

Respectfully submitted,

APPLICANT'S INVENTION

1. Applicant's invention is directed to stimulus sensitive gels comprising radioisotopes.

RESPONSE TO APPLICANT'S ELECTION

2. Applicant's election with traverse of Group VIII (claims 1, 2, and 5-27) in Paper No. 6, filed 5/31/02, is acknowledged. However, Applicant did not set forth reasons why the restriction is improper. Thus, the restriction is still deemed proper and is therefore made FINAL.

Note: It should be noted that claims 1, 2, and 5-27 will only be examined to the extent that they read on a radioisotope carrier comprising a gelling copolymer comprising methacrylamide.

WITHDRAWN CLAIMS

3. Claims 3 and 4 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention/species.

DOUBLE PATENTING REJECTION

4. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11

Art Unit: 1616

F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

5. Claims 1, 2, 5-16, 18-21, 23, and 24 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1, 3-13, 15-25, 30, and 31 of U.S. Patent No. 6,296,831. Although the conflicting claims are not identical, they are not patentably distinct from each other because the claims of the instant invention encompass those of the patented invention. In particular, it is noted that the radioisotope carrier in the instant invention is not limited to a reversible gelling copolymer as the patented invention.

112 REJECTIONS

6. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Art Unit: 1616

7. Claim 20 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 20, lines 4, 7, 9, and 11: The claim as written is ambiguous because of the term 'derivatives'. In particular, it is unclear what compounds are encompassed in Applicant's definition since a skilled practitioner in the art would not know which portion of the parent compound remains in the derivatives. Thus, it is respectfully suggested that Applicant delete the term.

CLAIM OBJECTIONS

8. Claims 17, 22, and 25-27 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

COMMENTS/NOTES

9. It is duly noted that Applicant has requested that the filing date be corrected. PTO records indicated that the filing date for 09/853,507 is 5/9/01. If the filing date is incorrect, Applicant is respectfully requested to submit the appropriate document in order that the correct date may be of record.

10. Applicant is respectfully requested to submit the year of reference 'DD' appearing on the information disclosure statement submitted 2/7/02, Paper No. 5.

Art Unit: 1616

11. Claims 1, 2, and 5-27 are allowable over the prior art of record; however, Applicant MUST address and overcome the double patenting and 112 rejections. In particular, the claims are allowable over the prior art of record because the prior art neither anticipates nor renders obvious a radioisotope carrier as set forth in independent claim 1.

The closest art of record is Applicant's own work, US Patent No. 6,296,831, which is cited in the double patenting rejection.

12. Any inquiry concerning this communication or earlier communications from the examiner should be directed to D. L. Jones whose telephone number is (703) 308-4640. The examiner can normally be reached on Mon.-Fri. (alternate Mon.), 6:45 a.m. - 4:15 p.m..
